inspire connection.

Reshaping workspaces for teams to thrive

logitech®

# Workspaces. Transformed.

The modern workspace has shifted. Today, organizations must redesign and realign their office environments to meet the evolving needs of the workforce – shaping diverse workspaces to become as smart, adaptable, and tech-enabled as the people they serve.

From small huddle areas to large boardrooms and the open spaces in between, collaborative meeting experiences require customizable technology. That means scalable solutions that drive creativity, productivity, and inclusivity. They must also deliver insights that enable organizations to understand how spaces are being used so they can adapt, optimize, and maximize ROI on technology and real estate investments.

Implementing seamless solutions for in-office and remote participants while managing the complexities of deploying and maintaining technology across multiple environments can be challenging.

However, delivering consistent, engaging meetings that enhance connection and creativity in any environment is no longer a nice to have; it's collaboration critical.

**Let's look at how Logitech team workspace solutions make this necessity a reality.**

# A flexible, collaborative workplace – powered by Logitech.

## How Neiman Marcus Group delivers an equitable employee experience

As a leader in luxury retail, Neiman Marcus Group (NMG) has always been a pioneer in innovating experiences. In 2020, the company applied that same passion to fuel its own journey towards a remote-first hybrid work environment and evolve its “work from anywhere” approach.

NMG’s vision was as simple as it was powerful: a workplace in which everyone, in every room and every location, “...could equally see, hear, and engage with each other.” Using human-centered design to guide the construction of its flagship hub office in Dallas-Fort Worth, it implemented Logitech technology across 99% of its conference rooms.

In the 18-month period following the implementation of its hub network strategy, NMG’s employee satisfaction score went up 34 points; employee retention has increased while time-to-hire has decreased.

**READ NMG’S SUCCESS STORY**

© Jason O’Rear

// The standard way to design meeting spaces is to center the process on who is in the building. We did the reverse. We put the remote experience first, which is why it’s completely seamless. It doesn’t matter where you are, because we designed it that way. //

**Eric Severson, Chief People, ESG,  
and Belonging Officer, NMG**

# A workspace for every team, wherever work happens.

Consistent experiences create effortless collaboration. Across office environments and out to the remote-working world, Logitech workspace solutions enable powerful productivity for everyone, everywhere.

From smaller focus and huddle rooms to ideation, training, and immersive spaces, we combine smart, sustainable technology with human-centered design to deliver better hybrid collaboration for workspaces of all shapes and sizes.

Simple to configure and easy to deploy, Logitech team workspace solutions provide effortless remote management to enhance end user experiences and streamline IT workflows. Elevated by complementary software and add-on devices, they are flexible and form part of a comprehensive portfolio of solutions from a single vendor.

# Focus Rooms

Delivering privacy in an office setting isn't always easy, but it's imperative. Focus Rooms give users the privacy they require in a way that's stress-free for IT, AV, and UC teams. One-touch collaboration empowers up to two people to join meetings, control audio and video, and free up more time to focus in small workspaces that teams can set up and maintain with ease.

## LOGI DOCK FOCUS ROOM KIT

An elegantly designed video collaboration solution with single-cable simplicity and plug-and-play laptop connectivity for instant meetings with professional-quality audio and video.

## TAP SCHEDULER

Signal availability from a distance and provide booking details up close with a scheduling panel. Help employees find, check-in, and reserve meeting spaces with ease.

# Huddle Rooms

Hybrid meetings require new technologies, but setting up spaces for spontaneous collaboration used to be a chore. Huddle Rooms remove those hurdles, enabling teams to implement solutions that bring hybrid meetings to life with intelligent audio and video technology that deliver a truly inclusive meeting experience.

## MEETUP 2

Connect to a meeting room system or directly to a laptop with an all-in-one video bar that brings intelligent features and multiple mounting options to USB and BYOD rooms with single-cable simplicity.

## RALLY BAR HUDDLE

For multiple deployment and connectivity options, Rally Bar Huddle provides the flexibility to choose between Android, USB, and BYOD laptop connections, alongside advanced sound pickup, noise suppression, and AI video intelligence.

## TAP

Bring one-touch join, calendar integration, instant content sharing, and a consistent experience across meeting rooms with a USB-connected touch controller.

# Small Rooms

Integrating devices to ensure users get the most out of meeting spaces is a top priority. And it has to be frictionless. Enhanced audio, video, and touch controls connect the conversation in configurable spaces for up to six people. Small rooms eliminate distractions and inspire collaboration with multiple video feeds, all from a single meeting space.

## RALLY BAR HUDDLE

For the flexibility of connecting in Android, PC, or BYOD mode, this all-in-one video bar delivers effortless video collaboration in huddle and small spaces, with an easy-to-set-up all-in-one camera that features AI-enhanced video and audio to ensure remote participants feel connected with those in the room.

## MEETUP 2

For connecting via a PC compute or in BYOD mode, deploy this video bar with ease using the included mount and to experience advanced, intelligent video conferencing.

Discover more about MeetUp 2 [here](#).

## TAP

Easily add one-touch join, instant content sharing, and calendar integration to meeting rooms with a wireless touch controller.

### **RALLY BAR**

With a dual-camera system and auto-framing technology, this all-in-one video bar features built-in AI technology, brilliant optics, and powerful audio to ensure crystal-clear communication. See and hear more clearly with extension Mic Pods and Logitech Sight.

### **RALLY BAR MINI**

With built-in AI video intelligence and advanced audio, Rally Bar Mini delivers powerfully simple video collaboration for small to medium spaces. Extend video and audio coverage in larger spaces with a tabletop camera and additional Mic Pods.

### **SIGHT**

An AI-powered companion camera with intelligent multi-participant framing, Sight adds a tabletop perspective to Rally Bar and Rally Bar Mini's front-of-room view for a truly immersive experience.

### **TAP IP**

Shape and share meeting experiences with a network-connected touch controller.

Discover more about Tap IP [here](#).

# Medium Rooms

Deliver an elevated hybrid meeting and collaboration experience for spaces for eight to 10 people. Smarter participant focusing, framing, and tracking captures the meeting room action, and voice pick-up and enhanced audio capture conversations with absolute clarity for deeper discussions.

# Large Rooms

A key challenge IT, AV, and UC teams face is deploying solutions that ensure all participants stay engaged in large meeting spaces. Keep everything – and everyone – in perspective with multi-camera systems designed to capture voices, faces, and in-room content with intelligent software and deliver an inclusive meeting experience where everyone has a seat at the table.

## RALLY BAR

The premier video bar for medium to large meeting rooms, Rally Bar combines built-in AI technology, brilliant optics, and powerful audio.

Learn more about Rally Bar [here](#).

## SIGHT

Add a tabletop perspective to your front-of-room video bar view.

Learn more about Sight [here](#).

## TAP IP

Shape and share meeting experiences with a network-connected touch controller.

Discover more about Tap IP [here](#).

## SCRIBE

Share the bigger picture with an AI-powered whiteboard camera that broadcasts whiteboard content into video meetings, delivering immersive collaboration with outstanding clarity.

# Ideation Spaces

Facilitate connection to inspire ideas and collaboration to bring those ideas to life with intuitive video technology designed for free-flowing meeting spaces. Combine interactive displays, modular components, and leading platform and integrative capabilities to give teams the tools they need to bring ideas to the table, together.

## **RALLY BOARD 65**

Deliver flexible video collaboration with an all-in-one device featuring an advanced camera system, beamforming microphones, a 65-inch touchscreen, and intelligent features. Rally Board 65 eliminates distracting visuals and noise for the ultimate collaboration experience in flexible and open spaces. Rally Board 65 offers deployment flexibility with versatile camera placement and mounting options for walls, on tables and credenzas, or paired with the cart accessory so it can be easily moved between spaces.

# Training Spaces

Shape educational experiences in classroom-style desk rows and engage attendees from every angle with a range of video technology solutions. Deliver hybrid training and encourage discussion with remote participants in an environment where everyone has room to learn.

## RALLY PLUS

Ensure superior meeting quality in large spaces with a premier modular video collaboration system that's easy to set up, simple to use, and includes mic pods and mounting kits for deployment flexibility.

## SCRIBE

Share the bigger picture with an AI-powered whiteboard camera that puts ideas into focus.

Learn more about Scribe [here](#).

## TAP IP

Shape and share meeting experiences with a network-connected touch controller.

Discover more about Tap IP [here](#).

# Immersive Spaces

Optimizing workspaces for hybrid collaboration is important, especially for video meetings where being eye-to-eye is key to the experience. With furniture designed to best position those in the room for audio and video capture, remote participants can stay engaged with an immersive view of the action.

## RALLY BAR MINI

With AI video intelligence, advanced sound pickup, and noise suppression, this all-in-one video bar delivers powerfully simple video collaboration.

Learn more about Rally Bar Mini [here](#).

## TAP IP

Shape and share meeting experiences with a network-connected touch controller.

Discover more about Tap IP [here](#).

# Open Spaces

Invite collaboration for new and exciting hybrid team experiences with flex desks, multi-purpose rooms, and open spaces. Experiment with layouts using modular video and mounted interactive technology that's designed to be fully movable. Easily deploy managed, bookable flex desks with Logi Dock Flex, and create a space that's always open for collaboration.

## RALLY BOARD 65

With a 65-inch touchscreen, Rally Board 65 is easy to deploy and fully mobile, giving teams the freedom to collaborate in almost any space.

Discover more about Rally Board 65 [here](#).

## LOGITECH VIEW

Make it easy for everyone to find the space they're looking for with Logitech View, a Logitech Room Booking feature that allows for easy wayfinding in offices on interactive touchscreen maps.

## LOGI DOCK FLEX

Enable easy and personalized desk booking with a managed docking station that enables a great user experience and better insights on occupancy.

# Enhance your workspace, your way

Choose from our range of simple, smart, and sustainable solutions, plus complementary accessories. Make the most of your spaces.

## RALLY BOARD 65

Rally Board 65 is an easy-to-deploy, all-in-one video conferencing board that delivers ultimate simplicity and flexibility. Deploy in all types of spaces with versatile camera placement and mounting options for walls, on tables and credenzas, or paired with the cart accessory so it can be easily moved between spaces.

## RALLY BAR

With a dual-camera system and auto-framing technology, this all-in-one video bar enhances meetings with Logitech RightSight 2 and RightSound 2 AI technology for intelligent video and audio experiences.

## RALLY BAR MINI

With built-in AI video intelligence, advanced sound pickup, and noise suppression, Rally Bar Mini delivers powerfully simple video collaboration for small to medium spaces. Extend video and audio coverage in larger spaces with a tabletop camera and additional Mic Pods.

## RALLY BAR HUDDLE

This all-in-one video bar delivers effortless video collaboration in huddle and small spaces, with an easy-to-set-up all-in-one camera that features AI-enhanced video and audio to ensure remote participants feel connected with those in the room.

## MEETUP 2

An all-in-one, USB-based conference camera with an ultra-wide lens designed for small rooms, MeetUp 2 connects to a PC or directly to a laptop, bringing intelligent, AI-powered technology to USB and BYOD rooms.

## RALLY PLUS

Ensure superior meeting quality in large spaces with a premier modular video collaboration system that's easy to set up, simple to use, and includes mic pods and mounting kits for deployment flexibility.

## SIGHT

Help remote employees get the best perspective in every hybrid meeting with an AI-powered tabletop camera that provides a front-and-center view of in-room meeting participants.

## TAP

Bring one-touch join, calendar integration, instant content sharing, and a consistent experience across meeting rooms with a USB-connected touch controller.

### TAP IP

Deliver one-touch join, content sharing, and the ease of a network-connected touch controller to meeting rooms.

### TAP SCHEDULER

A purpose-built scheduling panel for dedicated meeting rooms, Tap Scheduler makes it easy to find rooms and see if they're available via a spacious touchscreen and colored LED lights. Compatible with leading workspace service providers to enable full calendar and booking integrations.

### SCRIBE

An AI-powered whiteboard camera for use with a range of video collaboration platforms, Logitech Scribe integrates with Tap IP to broadcast whiteboard content directly into video meetings, delivering immersive collaboration with outstanding clarity.

### LOGI DOCK FLEX

Enable easy and personalized desk booking with a managed docking station that enables a great user experience and better insights on occupancy. Logi Dock Flex connects desktop peripherals, provides power to a laptop, and includes a 10.1" display to show desk availability.

### LOGI DOCK FOCUS ROOM KIT

Bring video collaboration to individual meeting spaces, focus rooms, and phone booths with a single USB-C cable connection to a laptop. Integrated with leading video conferencing platforms, Logi Dock allows employees to join any meeting with a single touch.

### LOGITECH VIEW

Enhance office navigation and booking with a powerful, interactive mapping solution. Designed to show office maps on a touch display, View provides an engaging way to find rooms, desks, and even coworkers with zoomable touch controls.

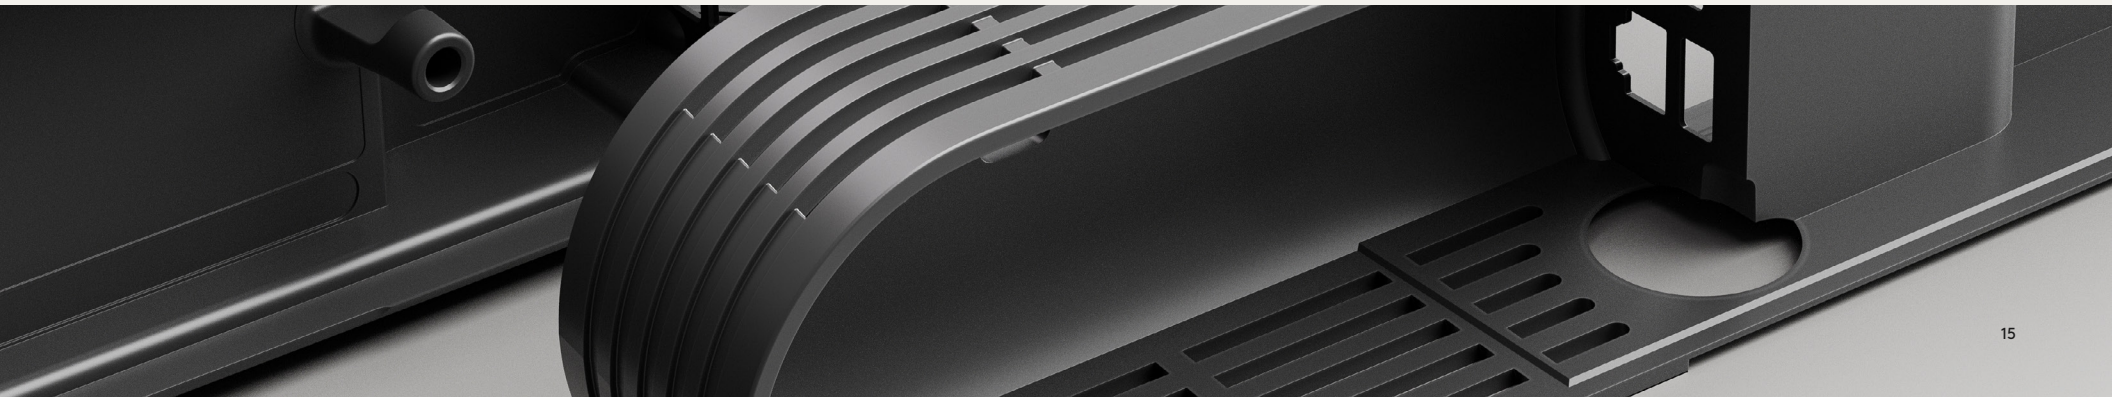

### SWYTCH

Enable single-cable BYOD connectivity in PC-based rooms with Logitech Swytch. Reduce the need for additional adapters with USB-A and USB-C connectors and integrated clean cable management.

### MEETUP 2 ACTIVE USB CABLE

Deliver single-cable BYOD connectivity between Logitech MeetUp 2 and personal devices. It makes for effortless BYOD meetings and reduces clutter by removing the need for multiple cables and adapters.

# Supporting IT with seamless services

Manage, maintain, and monitor your deployments and optimize performance across your entire workspace ecosystem.

## Software

---

### SYNC

Logitech Sync simplifies IT workflows with centralized device and space management for video collaboration devices. Complete with remote device configuration, Sync integrates with a variety of Logitech solutions to analyze and optimize performance across every space – enabling IT to inform usage decisions and maximize ROI.

### COLLABOS

Integrating with leading video workspace and scheduling services, CollabOS is the unifying operating system that runs on select Logitech video collaboration devices. Complete with leading security technology to safeguard devices and data, CollabOS helps IT teams deploy, manage, and ensure devices and software work seamlessly together – delivering a consistent experience across meetings and rooms.

## Services

---

### ESSENTIAL

Logitech Essential empowers IT teams with advanced software tools for efficiently managing meeting rooms, flex desks, and connected devices. Get insights on space and device usage, automated alerts for equipment failures, comprehensive remote device management tools, and the ability to set up desk or room booking to help employees find the best space for their needs.

### SELECT

With all Essential benefits included, Logitech Select goes one step further in helping you keep meeting rooms ready for the next meeting and eliminates barriers to collaboration. With global, 24/7 expert technical service, premium software tools, and next-business-day replacements, it helps you resolve issues before they impact your business while minimizing downtime costs.

## Technology Partners

---

Logitech solutions integrate with leading collaboration platforms, including Microsoft Teams, Google Meet, and Zoom. Streamline calendars, optimize scheduling, and enable one-touch join to deliver consistent meeting experiences.

## Sustainability

---

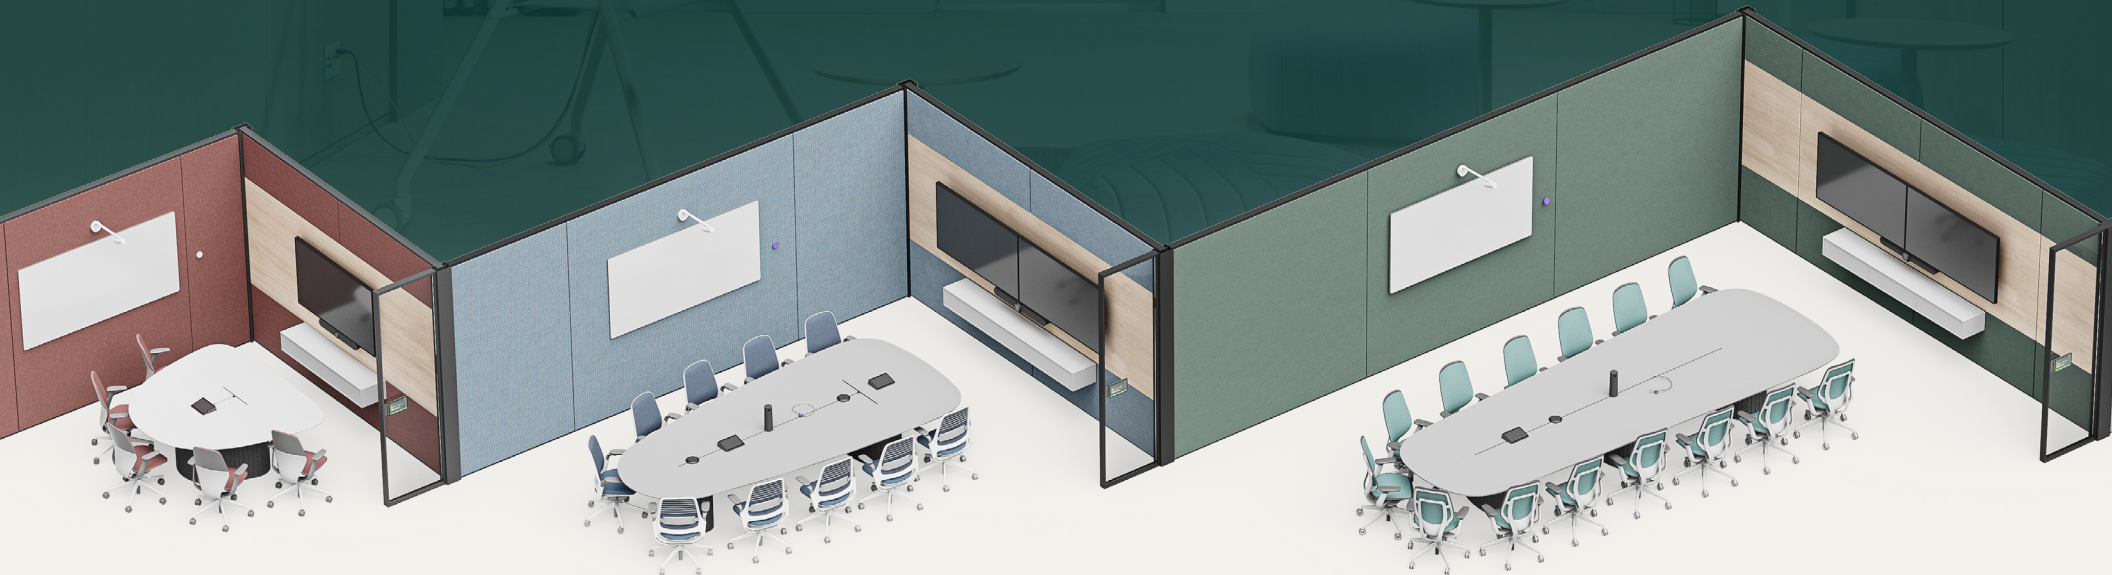

Incorporating Design for Sustainability principles into every aspect of our product lifecycle, we are dedicated to delivering more sustainable solutions for our customers. From design to manufacturing, delivery, and beyond, we use Next Life Plastics, recyclable materials, and replaceable parts to reduce our impact and extend the lifecycle of our devices.

# Ready to reshape your space and transform collaboration across your company?

As flexible work continues to evolve, so do the needs of your teams. Every workspace presents a new opportunity to customize collaboration, enhance experiences, and connect creativity with powerful productivity and inclusivity.

Discover how to make your workspaces work harder for your business with a comprehensive, integrated portfolio of innovative solutions from a single vendor.

Create your perfect setup with our Room Configurator.
