*Together, Logitech and our healthcare partners empower organizations to deliver high-quality care, regardless of location, using our combined, easy-to-manage video collaboration solutions.*

# THE FUTURE OF CONNECTED, VIRTUAL CARE

Reimagining What's Possible

**We are in a time of reimagining what's possible and making care more accessible and effective than ever.**

Expectations for what "high-quality healthcare" means have also shifted. With the consumerization of healthcare, patients will seek the best care, delivered in the easiest, least stressful way possible.

As a result, telehealth has become a viable, mainstream alternative to in-person care. And providers must now be able to deliver seamless continuity of care, regardless of geography or setting.

## Why Logitech

Along with our partners in healthcare, we advance virtual care adoption and efficacy. We believe that every healthcare interaction is an opportunity to improve lives—for patients, healthcare providers, and everyone who supports them. Together, we empower healthcare organizations to deliver high-quality care, regardless of location, using our combined, easy-to-manage video collaboration solutions.

As virtual care and telehealth services evolve and expand, we will continue to provide integrated solutions that deliver transformative, patient-centric care.

# BETTER TOGETHER: VIRTUAL CARE AND PROVIDER COLLABORATION

Together with our technology partners, we support healthcare providers who need to treat patients remotely, collaborate with colleagues, or expand access to care—safely, effectively, and conveniently.

## VIRTUAL CARE

By offering telehealth solutions to healthcare providers and important insights on video collaboration in care delivery, we strive to enable virtual care in the healthcare ecosystem of the future. So your teams can reimagine what's possible—from a patient's bedside, a provider's home, or anywhere in between.

Together, we offer you the tools to deliver high-quality remote care wherever video technology can be used. From behavioral health, outpatient, or ambulatory care to specialist consultations, remote patient monitoring (RPM), and care during a public health crisis, your teams can stay focused on improving patient outcomes while reducing costs and elevating the care experience for all involved.

## BENEFITS

---

**Improve experiences and outcomes** by offering simple, high-quality connections for patients and providers

---

**Provide high-quality care efficiently and conveniently** without requiring physical presence

---

**Strengthen continuity of care** by ensuring each patient's care team is aligned on treatment

---

**Achieve efficiency and safety objectives** through virtual rounding and remote patient monitoring, without compromising care quality or provider safety

---

**Protect your reputation** with high-quality video that enhances the care experience

---

**Reduce exposure** and minimize PPE use while providing critical care for at-risk patients

## PROVIDER COLLABORATION

With clinicians already experiencing major changes in the way they deliver care, it's vital to focus on simplicity in any new technology you provide.

At Logitech, we integrate with the leading video collaboration platforms to allow providers to confidently connect and consult with each other without adding steps to the workflows they're accustomed to.

## BENEFITS

---

**Expand your reach** and treat more complex cases with the help of specialists

---

**Communicate reliably and confidently** when discussing patient care plans and procedures

---

**Strengthen continuity of care** by ensuring your patient's care team is aligned on treatment

---

**Quickly treat and stabilize patients** in the field to save costly emergency room trips and reduce emergency room load

## Mobile Care

*In environments where every second counts, failure is not an option. Providers depend on technology that functions flawlessly within an ecosystem of related technologies.*

*Logitech's partnerships with healthcare companies enable providers to deliver high-quality care in settings outside the traditional facility environment. Our focus on ease of use means care teams can effectively and efficiently treat their patients without getting hung up on the technology.*

## SOLUTIONS

### PERSONAL COLLABORATION

Logitech makes tools healthcare providers can trust to enable care team collaboration and high-quality care delivery. With partnerships across leading video and telehealth platforms, we deliver simplicity and integration within existing digital health workflows. Our headsets and webcams are hassle-free, reliable, and just work no matter where your providers decide to take a virtual visit.

### ROOM SOLUTIONS

In healthcare environments, high-quality, flexible solutions are needed to work across many different room types, including exam rooms, inpatient rooms, conference rooms, and a provider's personal office. And within those environments, it's imperative that video collaboration tools work seamlessly with other applications and technologies being used.

With the breadth of our partnerships, we deliver the performance, installation ease, and device-management tools you need for high-quality telehealth interactions throughout your facility.

## FEATURED PARTNERSHIPS

When it comes to technology, the healthcare industry is enormously complex. Within that ecosystem, video technology is becoming a critical element for the patient care workflow. At Logitech, we partner with major vendors to make interoperability as simple as possible, to the benefit of providers, patients, and IT organizations. Below are featured partners we work closely with.
